SUBJECT INDEX, VOLUME 11, 1988

A

Activation antigens, 856, 865
ADCC activity, 568
Adoptive transfer, 807, 847
Age effects, 685, 879
Agglutination
  assays, 3, 34, 245, 298, 310
Agglutination,
  of protozoa, 586
  titres, 5
Agglutinins, 3, 297, 312, 698, 707
  age dependence, 173
  blood group specificity, 699
  biochemical characterization, 36, 37
  fish, 309
  hemolytic activity, 303
  isolation, 34, 35, 299, 311, 312
  occurence , 716
  physiochemical characterization, 314, 700, 710
  seasonal variation, 708
  sugar specificity, 39, 312, 698
  titres, 710
Algae, 695
Allogenic responses, 185, 226, 415 724, 740, 803
Allopregnancy, 174, 178
Amphibia, 99, 483
Anti-bacterial activity, 2, 259
  age and sex differences, 258
  insects, 255
Anti-bacterial factors, 189
Antigen absorption, 457
Anti-idiotype antibodies, 674
Annelids, 1, 189, 269, 279, 287
Autoimmune diseases, 364
Aves, 109, 121, 131, 145, 157, 319 331, 347, 363, 486, 611, 621, 629, 833, 843, 855, 879

B

Bacteria, 397
Blastogenesis assays, 686
Breeding programs and immunity, 611

C

Cecropins, 412
Cell proliferation
  161, 179, 209, 869
  assays, 866
  corticosterone, 131, 133
  hormonal effects, 837
  IFN, 661
  interleukins, 826
  mitogens, 139, 685, 687
Cell separation, 279, 280, 603, 605, 609
Chemiluminescence, 514
  assays, 512, 575
Chimeras,
  genetic identity, 743
  formation, 740
  resorption, 743
Cloning, 219
Coelomocytes,
  characterisation, 731
  hemolytic activity, 729, 731
  morphology, 4, 731
Complement, 272
  alternate pathway, 403
  fish, 406
  like activity, 757
Corticosteroids and immunity, 131, 483
Crustacea, 397
Cytotoxicity, 810, 818

D

Dendritic cells, 855, 863

E

Echinodermata, 55
Elasmobranchs, 561
ELISA, 763
Encapsulation, 242, 246
Encapsulation promoting factors, 241, 251
  purification, 245, 249
Endogenous phosphatase activity, 862
Erythrocyte lysis 302

F

Fc receptors, 561
  evolution, 568
  immunoresponsiveness, 421
Fibroblasts
  macrophage activity 651
Fluorescent labelled lectins
  cellular localization, 6, 24
  methodology, 3, 21
Fungi, 397

H

Hemocytes,
  agglutinin levels, 535
  secretion, 301, 544
  antigenic characterization, 25, 27 549
  variation, 17, 18, 22

separation, 549, 550
sub-population, 500
Hemolysin, 297
cellular origin, 729
bactericidal activity, 192
biochemical characterization, 56,56, 301
cellular origin, 731
in vitro binding, 45, 46, 51
lectin specificity, 28
morphology, 413, 553
proliferation, 19, 22
host defense, 734
immunofluorescent localization 732
isolation and localisation, 55, 56
serological characterization, 58
Hemolysis, 299
Hemolysis assays, 298, 730
Hemopoiesis
cell differentiation, 420
effect of pesticides, 94
Histocompatibility, 737, 801
alteration of response, 744
genetic basis in fish, 803

I

Idiotype/anti-idiotype networks, 669, 679, 689
Idiotype cross-reactivity, 761, 764
Immunization, 672, 675, 750, 845
birds, 622
Immunoendocrine interactions, 131, 223, 332, 375, 381, 481, 611, 833, 839
Immunofluorescence, 101, 159, 350, 369, 497, 604, 646, 730, 788, 857, 860
Immunoglobulins,
antigenic similarity, 321
anti-idiotype 766
biochemical characterisation, 123, 177
birds, 621
cellular localisation, 79
characterisation, 68
diversity, 761, 768, 769, 783
evolutionary conservation, 72
expression in tumors, 75, 77
genes, 70, 214, 222
heterogeneity, 780, 781
hormonal effects, 838
invertebrate phagocytosis, 272
isolation and purification, 122, 127, 414, 774, 776
lytic activity in fish, 757
pregnancy, 167
primitive vertebrates 415
sequence homologies, 70
serological cross-reactivity, 780
serum levels in fish, 781
sharks, 65, 561,
structure, 414, 782
Immunohistochemistry, 19, 24, 351, 856
Immunological diseases, 865
Immunological tolerance, 418
Immunomodulation, 670
Immunopathology, 85, 148, 149,
Immunosuppression, 85, 145, 181, 264
emetine, 385
manganese, 577
thiouracil, 615
thymic morphology, 393
Induced proteosynthesis, 289
Induced responses, 255, 259
annelids, 287, 291
birds, 332, 622
cellular activity, 335
effect of age, 881
fish, 582, 588, 753
hormonal regulation, 838
kinetics, 343
NK cells, 634, 639
Injection, 43, 723
Innate immunity, 750, 755
Insecta, 241, 255, 397, 521, 707
Insemination reactions, 521
Interferons, 645, 665, 666
macrophages, 657
Interleukins, 264, 664, 824
cell proliferation, 826
receptors, 829
receptor antibodies, 826

L

Lectins, 281, 495
biochemical characterization, 499
blood group specific, 695
cellular specificity, 24, 25
immunological properties, 499,
isolation and purification, 497
membrane associated, 502
molecular homologies, 316
sugar specificity, 8, 501
Lymphocytes,
age dependence, 686
antigenic characterization, 102, 103, 792, 826, 865, 874, 871
B-cell activity and IFN, 659

characterization 816
functional maturation, 867
heterogeneity, 782, 794
hormonal effects, 837
immunization, 102
maturation, 625, 657
ontogeny, 99, 220, 690
ontogeny /differentiation, 416
proliferation, 131, 133, 161, 163, 181
sub-populations, 80, 81, 99, 140, 603, 605, 788, 873
surface antigens, 829
T cell activity in fish, 796
T cell type proliferation, 366
Lymphoid tissues, 211, 220
Lymphoid tissues
antigenic characterization, 857, 860
B cell maturation, 625
birds, 486
bursectomy, 624
cellular characteristics, 862
cellular components, 791, 793, 855, 880
development, 790
effect of immunization, 846
effect of immunosuppressants, 385
gut associated, 454
hormonal effects, 375, 378
immunohistochemistry, 352
maturation, 870
morphology, 789, 849
NK cell activity, 629, 632
non-lymphoid cells, 855
ontogeny, 843, 849
PTU 145, 153
response to immunization, 843
splenic enlargement, 846
structure, 419
thymectomy, 616
thyroid hormones, 616
Lymphokines, 225
evolution, 401
Lysozyme, 259, 260

M

Macrophages, 645
antigenic characterization , 860
antigenic expression, 647
B-cell stimulation, 661
IFN binding, 648
immunoregulation, 665
stimulation, 109, 113
mammals, 167, 177, 375, 385, 645, 657, 669, 685, 865
Manganese, 573
Materno-foetal relationship, 417
Metamorphosis, 483
stimulation, 113
superoxide activity, 201
MHC, 214, 221, 801
antigenic cross-reactivity, 861
fish, 806
MHC restriction, 228
MHC antigens
IFN's 653
and macrophages, 647
Mitogens, 139, 153, 158, 160, 209, 364 368, 659, 687, 793, 834,
MLR, 802
genetic basis, 803, 806
Mollusca
bivalva, 43, 195, 297, 549, 719
gastropoda, 17, 33, 509
Monoclonal antibody production, 671, 856
Monocytes/macrophages,
NK activity, 813
Mononuclear phagocyte system, 862, 863
Mucins, 348
antigens, 348, 354
function, 359
purification, 351

N

Neuroimmunological disease, 417
Neurological dysfunction, 834
physiological effects, 836
NK cells, 595, 630, 809
cellular characterization, 810
functional morphology, 811, 813
maturation, 635, 638
morphology in fish, 811
and stress, 594
target specificity, 632, 636
Non-specific cytotoxicitv. 598

O

Opsonisation, 264, 273

P

Parasites. 749
Peroxidase activity, 213
Phagocytosis, 272
antigenic correlation, 23

in vitro methodology, 20, 110
and manganese, 577
ontogeny, 867
and superoxide, 514
Phenoloxidase system, 413
and insemination, 523
Pinocytosis, 861
Prostaglandins,
and B cells, 663
Protein binding in annelids, 290
Protozoa, 397
Protozoan infection, 581

R

Reptilia, 484, 603
Rosette formation, 535, 563, 566

S

Strain variation, 749, 758, 624, 624
Stress and
immunity, 482, 597, 600, 796
Superoxide production, 510

T

Teleosts, 75, 85, 201, 207, 309, 403,
453, 573, 581, 595, 749, 773,
782, 801, 809
Temperature effects, 254, 750, 794
Thy-1, 651. 652
Thymosins, 397
like activity in insects, 399
Tolerance, 226
Transplantation, 196, 415
tumors, 724
Tumors
antigenic characterization,
75, 77
fish, 207
mollusca, 719
pathology, 723
transmission in molluscs,
195, 198

U

Urochordates, 495

V

Vaccination, 459
adjuvants, 461
